

Maths Target 10

1. I can subtract 1 & 2 digit numbers to 100, using a 100 square.

2. I know my 5 x table (up to 10x5) and can recall random facts.

3. I can say the division facts for the 10 x table.
e.g. $3 \times 10 = 30$
therefore $30 \div 10 = 3$

4. I can count forwards in steps of 5 from any number to 100 e.g. 22, 27, 32, 37.

5. I can re-combine numbers up to and starting to cross 100, with no apparatus e.g. $40 + 5 = 45$
 $10 + 3 = 13$
 $100 + 6 = 106$.

6. I can add multiples of 10 on a 100 square and use these facts to 100 frequently.

7. I can read and show quarter to times on an analogue clock.

8. I can use my number bonds to 10 to work out number pairs to 20 e.g. $8 + 2 = 10$ so $18 + 2 = 20$

Maths Target 10

1. I can subtract 1 & 2 digit numbers to 100, using a 100 square.

2. I know my 5 x table (up to 10x5) and can recall random facts.

4. I can count forwards in steps of 5 from any number to 100 e.g. 22, 27, 32, 37.

6. I can add multiples of 10 on a 100 square and use these facts to 100 frequently.

3. I can say the division facts for the 10 x table.
e.g. $3 \times 10 = 30$
therefore $30 \div 10 = 3$

5. I can re-combine numbers up to and starting to cross 100, with no apparatus e.g. $40 + 5 = 45$
 $10 + 3 = 13$
 $100 + 6 = 106$.

7. I can read and show quarter to times on an analogue clock.
